A Border of Olds' Darwin Tulips.

PLANT NOW FOR BEAUTIFUL SPRING FLOWERS

Tulip Planting time is here. Now is the time to make plans for your gay spring garden. In summer our gardens should be quiet and restful but in the spring after long winter months the air is filled with gayety, the gardeners are gay and so should our gardens appear. It would seem that tulips were designed for this purpose; bright, gay and cheerful, they usher in the spring with all its splendor. Plant the spring flowering bulbs freely, in the border, among the shrubbery and in the rock garden. They are easy to grow and their vivid beauty in the spring repays the cost many times over. Bear in mind the hardy bulbs you plant this fall, with proper care, are going to flower not one season only, but three or more. You never have too many tulips. They are indispensable for Memorial Day and for home decorations.

OUR GUARANTEE

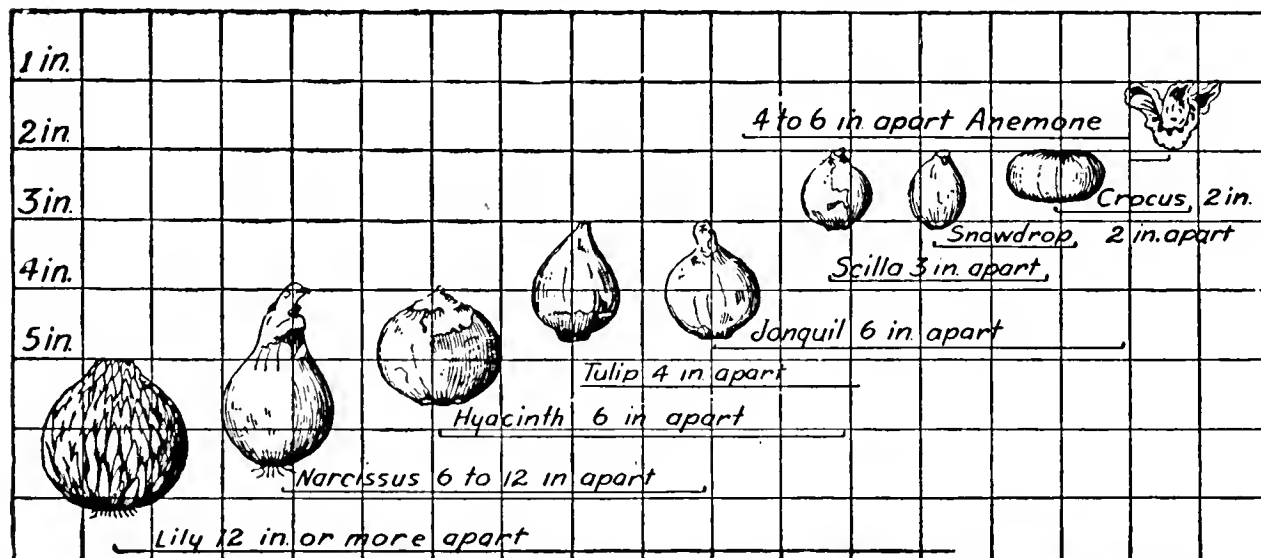

We guarantee all bulbs sent out to be of large size, true to name and to arrive in satisfactory condition. If upon arrival our bulbs are not equal or superior to any bulbs you have purchased or you are not entirely satisfied, they may be returned to us and your money will be promptly refunded. Bulbs and Seeds are planted under varying conditions of soil and climate and we will not be responsible for them after they are planted. Nor do we give any further warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out and will not be responsible for the crop. Subject to the above, we make our sales at the moderate prices at which we sell our goods.

HOW TO ORDER

Send in your order as early as possible on the enclosed order blank. It will be acknowledged at once and filled just as soon as our bulbs arrive from Holland. Later in the season our stocks may become broken and it will probably be impossible to replace them. Orders for plants will be sent about Sept. 15th, weather permitting. No postage is required as prices include postage. Our terms are cash with the order or we will ship C. O. D., providing one-fourth of the amount accompanies the order. Field seeds, however, unless otherwise noted, are sent express or freight collect.

HOW TO PLANT

Plant only the finest quality bulbs. Olds' Bulbs are the best that can possibly be secured. They have a reputation for large flowers and uniformity of size and color. Tulips should be planted in the open ground as early in the fall as possible, as this gives them time to make suitable root growth before freezing weather. They can be planted right up to the time the ground freezes, but with late plantings be sure that a very heavy application of mulch is placed over the beds. All bulbs should be planted to the depth shown in the diagram. Set the bulbs firmly, taking care not to leave an air space at the base of the bulb where water will settle and cause the bulb to rot. Choose a well drained location. This is most important. If you do not have a suitable place raise the bed about six inches for good drainage. Bone Meal is a good fertilizer to use as it will not burn. It should be applied at the rate of two handfuls to the square yard. Cover the bed after the ground freezes with some form of mulch. This is not to keep the bulb from freezing but to keep the ground frozen until danger of frost is over in the spring.

This diagram shows you the depth and distance apart to plant bulbs

SPECIAL EARLY ORDER OFFER

With every order for bulbs amounting to \$2.00 or more, received before Oct. 15th, we will include free one dozen assorted early flowering bulbs. Send your order early and take advantage of this special offer.

EARLY FLOWERING SINGLE TULIPS

FIRST TO BLOOM

Olds' Early Tulips grow about seven to fifteen inches tall, are entirely hardy and bloom two weeks earlier than Darwin or Cottage Tulips. They usually blossom in April, continuing for a period of two to three weeks. These dauntless leaders in the season's procession of bloom, gaily put forth their valiant colors while most plants still are dormant.

Though not as tall as the later varieties, early tulips rival them in brilliance of color, and frequently in size.

EARLY FLOWERING DOUBLE TULIPS

Double Tulips are about the same in height, a trifle later in season, remaining in bloom a little longer than the single early class. Their mammoth double peony flowers make a beautiful display in beds (see illustration below) or planted in with the single earlies to extend the blooming season. This class is also prized for growing indoors in pots. Having a larger flower they require a fertile soil in order to reach perfection.

Botanical Tulip, Clusiana, in the Rock Garden.

BOTANICAL OR WILD TULIP SPECIES

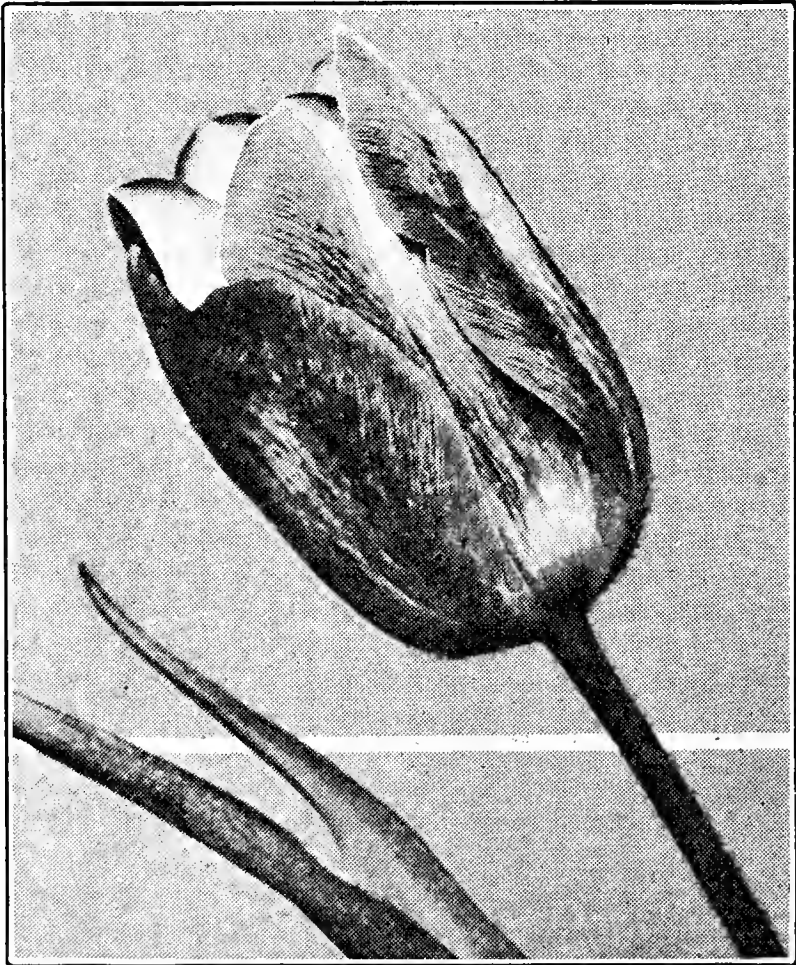

Botanical or Wild Tulip species are recommended for rock gardens and hardy plant borders. The general characteristics of these are bright colors and recurved petals.

The flower opens flat and is carried on a stem less than one foot in height. Blooms early in April. Splendid for naturalizing in a shady nook. Prices: 6 for 45c; 12 for 80c; 100 for \$6.00, postpaid.

CLUSIANA. (8 in.) (Candy Stick Tulip.) Outer petals bright cherry red and inner petals creamy white with violet base. Small flower but very distinct. Plant in warm, sheltered location. They will prove a gem among early flowers. The flowering season is late April and it grows to a height of about 8 inches. Prices: 6 for 50c; 12 for 90c; 100 for \$6.10, postpaid.

OLD DUTCH BREEDER TULIPS

MANY RARE SHADES FOUND IN THIS CLASS

Breeder Tulip, Bronze Queen.

This fine, old May-flowering type of Tulip has been neglected for many years, but is again becoming popular; in fact, Breeder Tulips have, for the past four or five years, been given great prominence in many of the strictly up-to-date gardens.

They are very similar to the Darwins in their tall growth, and have even larger flowers. They bloom about the same time, but have an entirely different range of colors, comprising bronze, terra cotta, orange brown and other artistic tones altogether wanting in the Darwins.

BRONZE QUEEN. (28 in.) Soft golden bronze. Prices: 6 for 35c; 12 for 65c; 100 for \$4.50, postpaid.

CARDINAL MANNING. (28 in.) Rosy violet. Prices: 6 for 35c; 12 for 65c; 100 for \$4.50, postpaid.

DON PEDRO. (26 in.) A beautiful cocoa brown shading to maroon. Inside a rich mahogany. Prices: 6 for 35c; 12 for 65c; 100 for \$4.50, postpaid.

GERMAN PEAT MOSS

Peat Moss makes the finest mulch for plants and bulbs that we know of. It does not mat down and choke the plants as leaves have a tendency to do, nor will it bring weeds into your garden as is often the case when you use hay or straw. Furthermore, Peat Moss will improve your soil; it is especially fine for heavy clay soils and light, sandy soils.

A further use for Peat Moss is in the Rock Garden. It is difficult to keep the weeds out of a Rock Garden and as most Rock Gardens are built on a slope heavy rains will wash the soil. A good application of Peat Moss will check the weed growth and will also help to prevent the soil from washing.

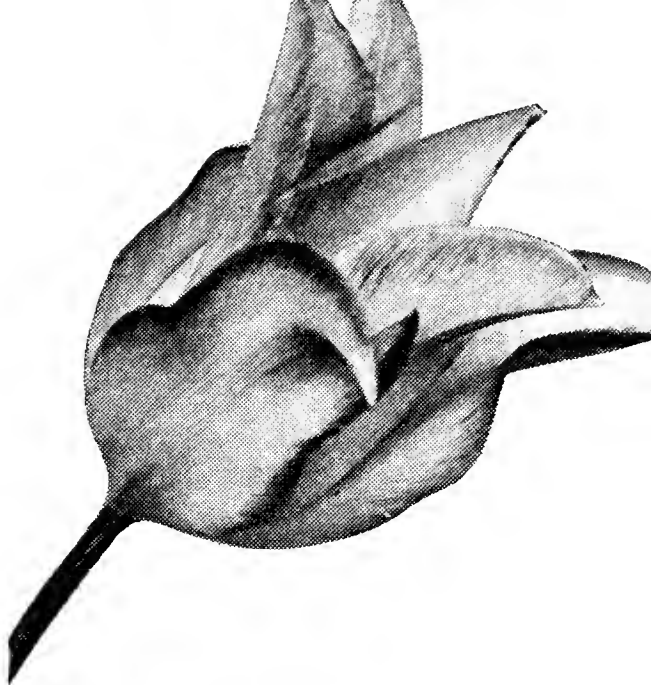

Prices, not postpaid: Carton of about two bushels, 65c; ¼ bale (about 5½ bu.), \$1.25; full bale (about 22 bu.), \$3.00.

Cottage Tulips

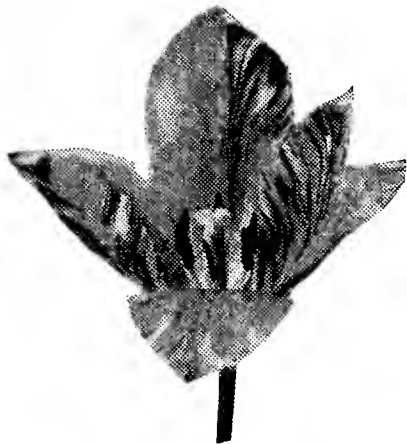

COTTAGE TULIPS, like the Darwins and Breeders, flower during May outdoors. The flowers have distinct colors, with oval or pointed petals.

MRS. MOON. (22 in.) The finest late, yellow tulip thus far introduced; blossoms long and pointed, petals reflexed, fragrant and borne on long stems. Prices: 6 for 35c; 12 for 65c; 100 for \$4.50, postpaid.

MAIDEN'S BLUSH. (18 in.) Long, lily-shaped flowers of ivory-white, tipped and edged with rose which gradually deepens. One of the finest. Prices: 6 for 30c; 12 for 55c; 100 for \$4.20, postpaid.

Cottage Tulips, Maiden's Blush.

Rembrandt Tulips.

Rembrandt Tulips

Rembrandt Tulips have long stems with large flowers and they bloom at the same time as the Darwins. They are really broken forms of Darwins, the difference being in their unique color; the flowers are striped and variegated. Too gaudy to plant alone in large beds but beautiful planted in with other tall tulips.

SPECIAL MIXED REMBRANDT TULIPS. Prices: 6 for 45c; 12 for 85c; 100 for \$5.25, postpaid.

Fancy Parrot Tulips

The petals of these tulips have peculiarly feathered and fringed edges and the shape of the flower, especially before it opens, resembles the neck of a parrot.

A magnificent, large flowering, tall growing, late tulip.

SPECIAL MIXED PARROT TULIPS. (15 in.) Prices: 6 for 32c; 12 for 60c; 100 for \$4.35, postpaid.

FANTASY. A remarkable Parrot Tulip with a straight, strong stem, a quality which has always been lacking in Parrot tulips. This variety is a sport of the well-known Darwin tulip, Clara Butt, and has the same clear, pink color as its parent, combined with artistic form of a Parrot tulip. Each petal is over three inches long, and two inches across. The center of the petals on the outside is marked emerald green. Each, 10c; 6 for 55c; 12 for \$1.00; 100 for \$7.00, postpaid.

New Parrot Tulip Fantasy.

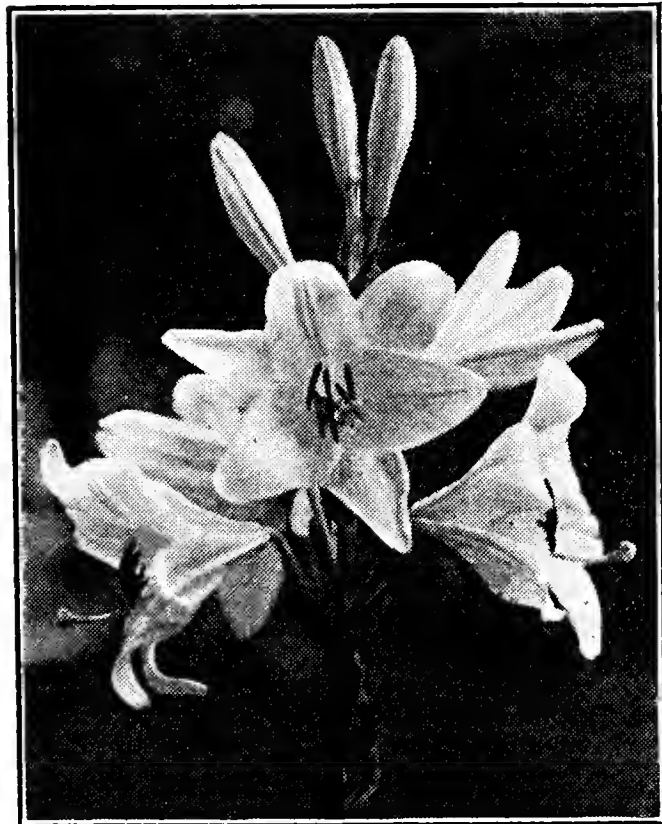

HARDY LILIES

The beautiful fragrant Lilies are considered by many too difficult to grow. However, the hardy varieties which we list are no harder to grow than a tulip. They blossom in mid-summer when fine flowers are most welcome.

CULTURE. Select a place to plant that is well drained. The soil should be spaded thoroughly 15 to 18 inches deep. Do this early in the fall as lilies cannot be moved until late and it is hard to work the ground late in the season, especially after we have had light frost. Enrich the soil with leaf mold and well rotted manure in equal proportions. Set the bulbs 4 to 8 inches deep, depending on the size, tilting to a 45 degree angle. To insure good drainage pack sand around the bulb. Place about four inches of mulch over the bed.

LILIUM CANDIDUM OR MADONNA. Plant about the first of October. They grow to a height of two to three feet and bloom about the first of July. Sometimes as many as 20 blooms are borne on a plant. Our Madonna Lily bulbs are extra large and measure from 26 centimeters up in circumference. They are grown for us in northern France and are the thick petaled variety. Prices, Extra Large 26 Ctm. Bulbs: 20c each; 3 for 55c; 6 for \$1.00; 12 for \$1.90.

LILIUM REGALE. Ready Nov. 1st. One of the most beautiful varieties of hardy lilies offered today. The center of the flower is flushed with yellow, shading to white at the outer edges. Externally the flowers are streaked with brown shaded through the almost translucent petals with a delightful pearly tint. A truly royal lily. Grows to a height of four to five feet and blooms in July. Selected bulbs, extra large, each, 20c; 3 for 55c; 6 for \$1.00; 12 for \$1.90.

DAINTY DAFFODILS OR NARCISSUS

Plant Narcissus this year.

Many consider the Narcissus or Daffodil the most important of the spring flowering bulbs. Coming into bloom two or three weeks before the earliest tulips, they open the real flower season. There are many varieties in each class and we have selected the ones we consider the best. All our bulbs are Extra Large Double Nose. 6 bulbs at half the price of 12 and 50 for half the price of 100.

Poeticus Narcissus, Horace.

GIANT BLOSSOMING HYACINTHS

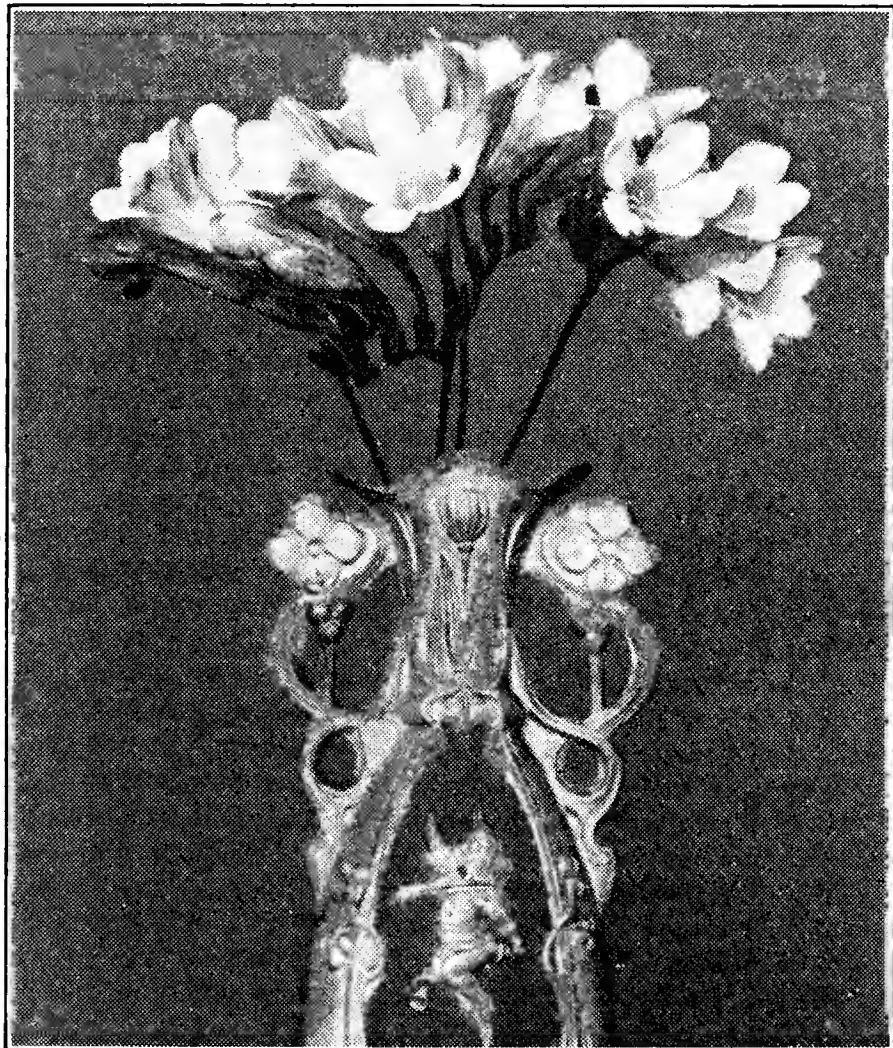

For Outdoor Planting. The 15 and 16 centimeter bulbs are the most satisfactory sizes to use for outdoor planting. Smaller bulbs are often offered but we do not recommend them. Select a well drained location and spade to a depth of 12 inches, plant the bulbs according to the diagram shown on page 2. Bulbs may be planted up to the middle of November but it is best to plant just as soon as you receive the bulbs.

Hyacinths seem to do particularly well planted a short distance from the foundation of the house on the east and south exposure.

Cover the bed well with mulch as soon as the ground becomes frozen.

For Indoors. Use only the largest size bulbs such as our 19 centimeter size, pot 1 bulb in a five-inch pot, or 3 in a six-inch pot. Place a piece of broken pot or a stone over the hole in the pot; then practically fill the pot with rich, light soil, break off all the shoots from the main bulb and place in the soil so that the top will be about one inch from the top of the pot; then fill the pot with soil up to one inch from the top, water well and set in a cool, dark place. After 6 to 10 weeks they can be brought to the light.

Hyacinths can also be forced in water but usually not as satisfactorily. Fill the glass with water so that it nearly touches the bulb. Place a piece of charcoal in the water to keep it sweet, put away in a cool, dark place until roots are about 8 inches long and then gradually bring to the light.

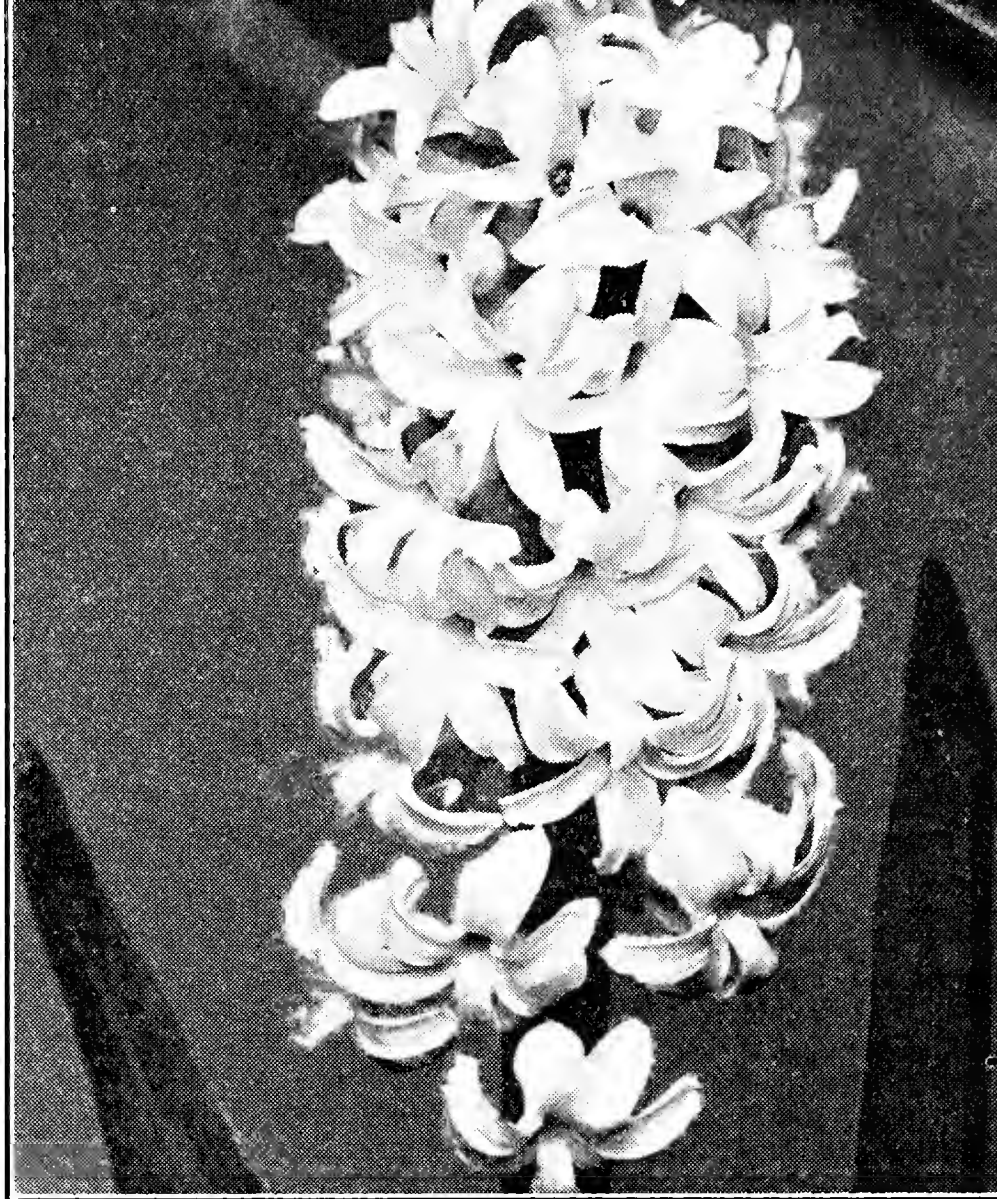

Freesia, Giant Purity.

FREESIA

GIANT PURITY. Glistening white fragrant trumpet-shaped flowers borne in rows on bent stems. Just plant half a dozen of them in a five-inch pot in September and keep outside until danger of frost. Bring indoors and place in the sunny window of a fairly cool room. 6 for 15c; 12 for 25c; 100 for \$1.75, postpaid.

GOLDEN DAFFODIL. Golden yellow with bright orange blotch on the lower lip. A new variety of Freesia. 6 for 20c; 12 for 30c; 100 for \$2.00, postpaid.

L'Innocence Hyacinth.

The Hyacinth is the most formal of the Dutch Bulbs and the most highly perfumed. Carefully grown in the indoor window garden, Hyacinths reach a perfection of color and bloom that marks them as one of the finest products of the gardener's art. Only large bulbs such as we offer in our named varieties and "Finest Mixed" should be used for forcing, but for outdoor growing in beds or borders the medium sized bulbs in our "Special Bedding Mixed" are satisfactory.

(19 ctm. Bulbs for Forcing)

L'INNOCENCE. Pure white, extra large bells. A wonderful variety for forcing. Each, 15c; 6 for 80c; 12 for \$1.50, postpaid.

OLDS' PEONIES FOR FALL PLANTING

In Japan they call the peony the "King of Flowers" and its splendid, massive and richly colored blossoms justify this title. As hardy as an oak, thriving equally well in sun or partial shade. Well worth growing for its wealth of ornamental foliage alone. The roots we offer are large three to five-eyed divisions and will usually bloom the following spring. Our prices are postpaid. Too deep planting often is the reason why peonies fail to bloom. The eyes should not be more than two inches below the surface. Fall is the best time to plant peonies.

WHITE VARIETIES

FESTIVA MAXIMA. Big, globular masses of pure white bloom, the inner petals slightly tinged with crimson. These handsome flowers are borne on tall, sturdy, branching plants of vigorous growth. Festiva Maxima is probably the most popular of all peonies and by many considered the most nearly perfect. Each, 50c; 3 for \$1.25.

DUCHESS DE NEMOURS. Crown type, pure white, with a sulphur white collar. An early variety. A very vigorous grower throwing clusters of fragrant bloom. One of the best whites. Each, 50c; 3 for \$1.25.

LA TULIPE. Rose type, midseason. Enormous globular flowers of delicate blush white, shading to ivory white. There are red tulip markings on the outside of the guard petals. Each, 50c; 3 for \$1.25.

MARIE LEMOINE. Compact round flower of rose type, very late. Color white, with cream white center. Each, 60c; 3 for \$1.50.

M. DUPONT. Large flat rose type, milk white center, splashed crimson. Mid-season, fragrant. Each, 50c; 3 for \$1.50.

MIXED WHITE. We offer choice 3 to 5-eye divisions of unnamed whites: 3 for 90c; 6 for \$1.75; 12 for \$3.25. By express, 100 for \$25.00. These peonies are fine for landscape work.

KARL ROSEFIELD. The plant throws large clusters of dark crimson flowers; these are of the semi-rose type and have no odor. Plants are strong and healthy. This is one of the best for cut flowers, landscape or for florists. Each, 70c; 3 for \$1.90.

MAJOR ANDREE. Brilliant cerise, an unusual shade in peonies. Long blooms on tall, strong plants. Each, 50c; 3 for \$1.25.

TENUIFOLIA FLORA PLENA (Double Fern-leaf Peony). Very early, the first peony to bloom. Flowers are a full double brilliant crimson. Very rare. Each, \$1.50; 3 for \$4.00.

PINK VARIETIES

M. JULES ELIE. This is considered the most beautiful of all peonies. The flowers are of immense size, globular in shape. The color is a glistening lilac-pink, shading to rose at the base. The whole flower is overlaid with a sheet of silver, sparkling like dew. One of the best for cut flowers; a good keeper. Each, 60c; 3 for \$1.50.

LIVINGSTON. Large rose type; pale lilac-rose, silver tipped with carmine spots, late, tall, compact, free bloomer, slightly fragrant. Each, 60c; 3 for \$1.50.

HUMEII. Very large flowers of soft cherry-pink. This is a very fragrant variety, having that spicy odor so peculiar to the Orient. Very late. Each, 50c; 3 for \$1.25.

WISCONSIN PEDIGREE NO. 6 WHITE WINTER RYE PLANT RYE THIS FALL

Wisconsin Pedigree No. 6 is a new strain of Winter Rye recently released by the Wisconsin Experiment Station. We offered it for the first time three years ago. Its strong feature is its very light color, almost pure white. Prof. Leith says, "The Pedigreed White Rye is the result of an effort to get a nicer appearing rye than we had in the old Pedigree Schlanstedt and meet the expectations of millers and bakers who prefer lighter colored ryes."

This new rye is just as good a yielder if not better than the old Wisconsin Pedigree and it has a big advantage in quality. It is also shorter in straw. We recommend it as the best in rye.

OLDS' WISCONSIN PEDIGREE NO. 2 WINTER WHEAT

If you are going to sow some Winter Wheat this fall and a few acres may prove very profitable, do not sow "just wheat" but sow Wisconsin Pedigree No. 2. This is one of the list of famous pedigree grains put out by the Wisconsin Experiment Station. It is from the well-known Turkey Red and has all the good characteristics of that variety—hard red grains, bearded heads, vigorous growth and extreme hardness.

Wisconsin Pedigree No. 2 is the hardiest of all winter wheats for this section, produces large, plump kernels and outyields all others.

REED CANARY GRASS PLANT NOW PRICES LOW

The New Grass for Wisconsin Lowlands.

Reed Canary Grass is a very valuable new perennial hay and pasture crop especially desirable for low, marshy land. Nothing like it has been thus far produced as it puts land that is just a dead waste into production of valuable forage. Continues to grow without care or attention. Very highly recommended by the Wisconsin and Minnesota Experiment Stations.

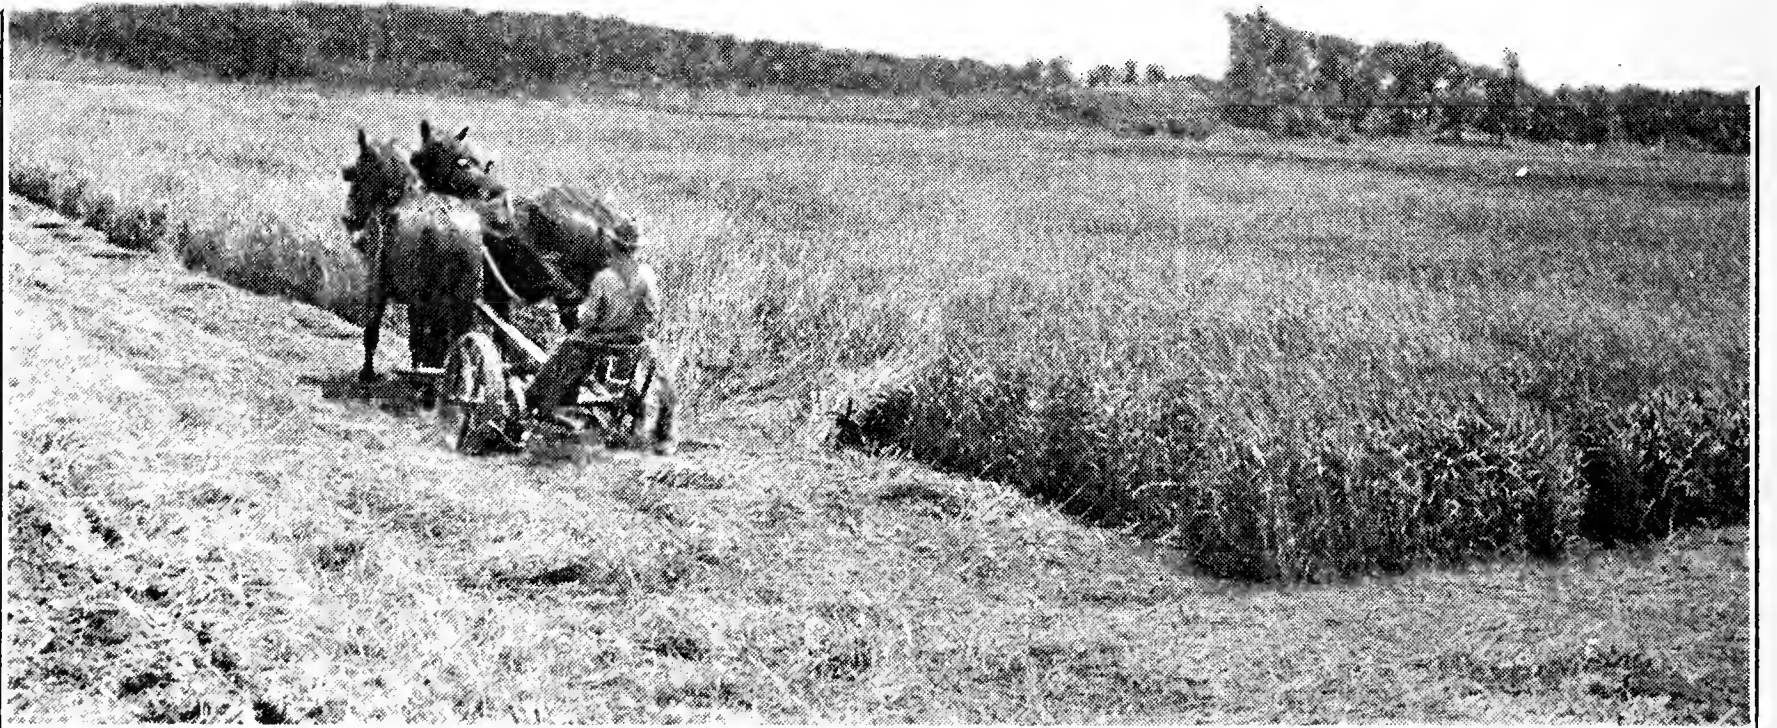

Prices now are the lowest since its introduction. Get started with this new grass while the seed is cheap. Ideal weather and growing conditions produced a bumper crop of seed this year.

For Pasture it lengthens the grazing season as it starts very early in the spring, and beginning before June 1st, will furnish an abundance of pasture throughout the entire season until late in the fall.

For Hay. It makes a heavy yield of good quality hay better than timothy and far superior to wild hay. Ordinarily two or more cuttings can be made in a season. As high as seven tons of hay per acre have been produced in one season.

CULTURE. Seed sown just before the ground freezes up will lie in the ground over winter and be ready to grow early in the spring. The ground in the fall is usually dry so that teams with implements can work the soil. Sow 4 to 6 pounds to the acre with a drill. Seed can also be sown in August and September with good results. There is danger, however, of young seedlings winterkilling, or drowning out in the spring, with unfavorable weather.

Prices, by mail: Lb., 75c; 3 lbs., \$1.95. By freight: Lb., 65c; 5 lbs., \$3.00; 10 lbs., \$5.50; 100 lbs., \$50.00.

FIELD SEEDS FOR FALL SOWING

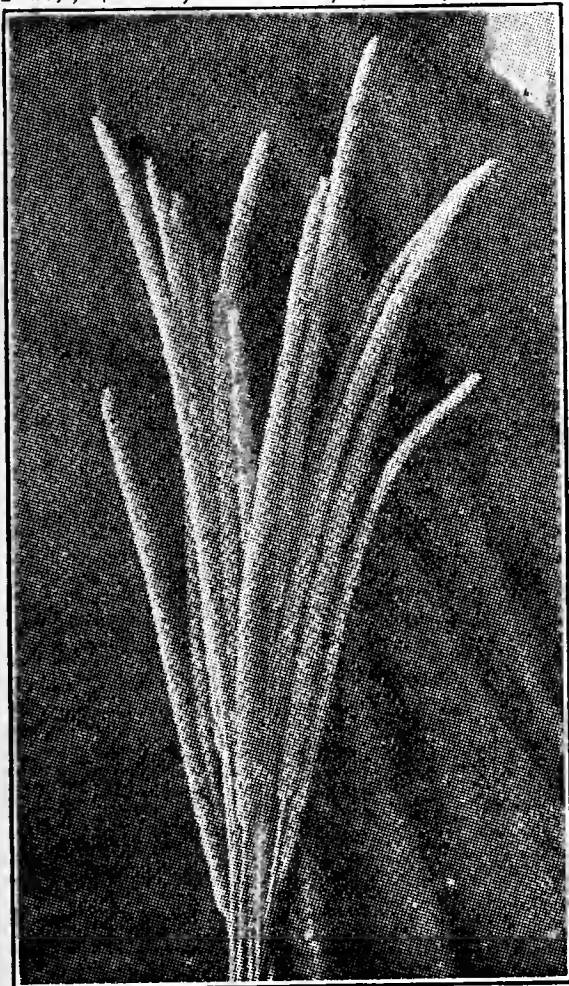

OLDS' TIMOTHY SEED

 Our Timothy Seed is the purest and best that can be obtained. It is all thoroughly recleaned and free from noxious weeds, with high tests, most of it testing 99.6 per cent purity or better. Present prices are ridiculously low. Last year our best seed was \$21.00 per 100 pounds at the beginning of the season. Today our selling price is only \$6.00 per hundred pounds. It may be higher later, probably will be, but it is a good year to sow seed liberally.

Prices, Old Gold Brand, by mail: Lb., 20c. By freight: 1/2 pk., 45c; pk., 80c; bu. (45 lbs.), \$2.90; 100 lbs., \$6.00; 500 lbs. at \$5.85. Bags extra at 30c.

OLDS' FANCY RED TOP

RED TOP is a very valuable general-purpose grass. A good meadow grass, one of the best for pasture and splendid for lawns. It not only succeeds on dry land but is also adapted to moist soils.

Red Top will produce a very desirable hay and will thrive and yield well especially on low, flat ground not adapted to clovers and alfalfa. For best results, Red Top should be sown early in September.

Use plenty of seed. The crop was again fine and the price is very reasonable, much lower than last year.

Fancy Solid Seed. (Recleaned, free from chaff.) By mail: Lb., 30c; 3 lbs., 60c. By freight: 5 lbs., 85c; 10 lbs., \$1.45; 100 lbs., \$11.50; 500 lbs. at \$11.00. Bags extra at 30c.

SWEET CLOVER

Sweet Clover should be planted this fall. Its value is three-fold. It makes a good pasture, builds up the soil and produces a valuable hay crop. Note prices below.

OLDS' NEW PASTURE MIXTURE

The Division of Forage Crops, U. S. Department of Agriculture, calls attention to the fact that as a result of the A. A. A. program approximately 40 million acres throughout the United States of such crops as wheat, corn and tobacco will be withdrawn from production and devoted to pasture, cover crops, meadow crops and soil improvement crops.

They are suggesting a number of "Pasture Plant Mixtures," adapted to different sections. The one that they recommend for our section we are offering our customers as our "Olds' New Pasture Mixture." This mixture is made up of Kentucky Blue Grass, Timothy, Red Top, Red Clover and Alsike, the percentages of the seeds used in the mixture running in the order named. Sow 20 pounds per acre for a good stand.

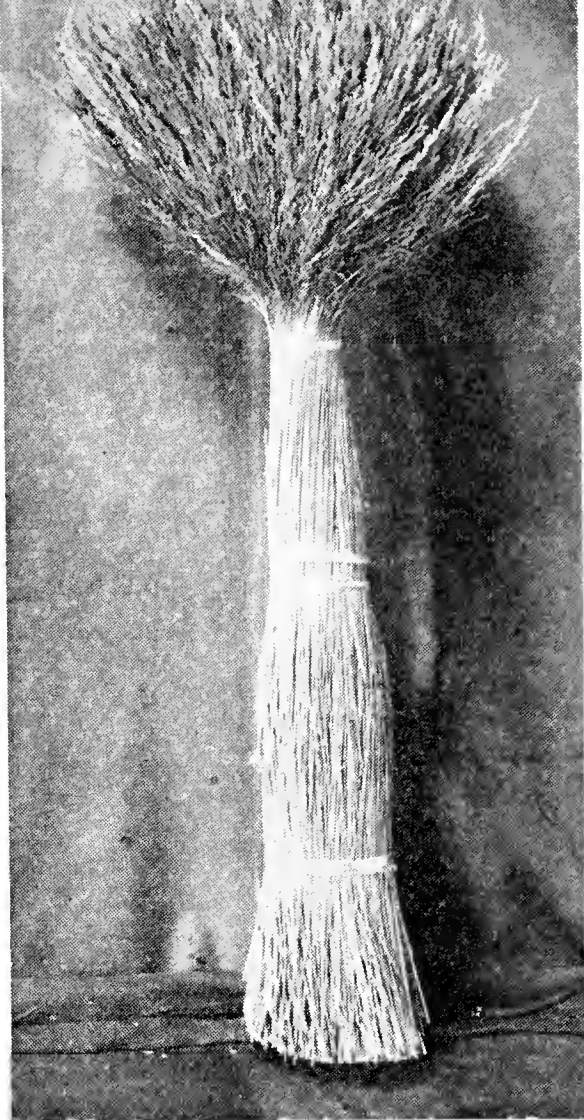

Prices, by mail: Lb., 25c. By freight: 5 lbs., 95c; 10 lbs., \$1.70; 100 lbs., \$14.00; 500 lbs. at \$13.75. Sacks included.

OLDS' LAWN GRASS

Fall is an ideal time to make a new lawn or reseed the old one. Grass Seed sown in August and September will sprout and thrive for a long period under favorable conditions before winter sets in. Then, too, weeds are gone in the fall permitting the grass to grow without interference. The winter is not nearly as severe on a lawn as the drought and heat of the summer, and by the time summer arrives the new grass will have had six to seven months of good growing weather so as to be well established for the summer ordeal. Reseed the bare places. Use seed freely, at least one pound for each two hundred and fifty square feet, for reseeding about one-half this amount.

Olds' Lawn Grass has won a reputation. Critical landscape gardeners use our mixtures. We offer four very fine mixtures varying in price according to the amount of highest priced seed used. None of them contain timothy and none are cheap mixtures.

It is poor economy to sow cheap, lightweight lawn grass such as is offered in many stores.

MADISON PARKS LAWN GRASS

Olds' Madison Parks Lawn Grass is a very carefully prepared mixture of high grade, heavy seed, that has been used extensively for several years in the parks about Madison. The seed is composed of White Dutch Clover, Creeping Bent, Rough Stalked Meadow, Chewings' Fescue, Fancy Red Top, Fancy Kentucky Blue Grass and others mixed in proper proportion. We recommend Madison Parks Lawn Grass as our best lawn mixture.

By mail: Lb., 45c; 3 lbs., \$1.10. By freight: Lb., 35c; 5 lbs., \$1.60; 10 lbs., \$3.00; 100 lbs., \$26.00.

WISCONSIN SHADY MIXTURE

A new mixture recommended by Prof. Aust. Rough Stalked Meadow, a fine grass that has proven wonderfully successful in dense shade, is very largely used in this mixture. This mixture also contains other high priced grasses that are specially adapted to shaded locations. There is an increasing demand for a lawn grass that will really do well in the shade. We recommend this.

By mail: Lb., 50c; 3 lbs., \$1.25. By freight: Lb., 40c; 5 lbs., \$1.80; 10 lbs., \$3.50; 100 lbs., \$30.50.

CAPITAL LAWN GRASS

Olds' Capital Lawn Grass is made up of substantially the same grasses and the same grades of seed that were used to make the beautiful lawn surrounding Wisconsin's magnificent Capitol building here at Madison. It is composed of heavy seed of the highest germination but contains no White Clover.

By mail: Lb., 40c; 3 lbs., 95c. By freight: Lb., 30c; 5 lbs., \$1.30; 10 lbs., \$2.50; 100 lbs., \$21.00.

LAKES' LAWN GRASS

A good mixture at a low price. We have been making it for years and it has given general satisfaction. This mixture will probably make a better showing the first year than any of the others.

By mail: Lb., 35c; 3 lbs., 85c. By freight: Lb., 25c; 5 lbs., \$1.15; 10 lbs., \$2.10; 100 lbs., \$17.50.

MOWING THE LAWN: Improper mowing will injure your lawn. We advise not cutting the grass shorter than 1½ inches. Cutting to this length will require more frequent mowings. We advise leaving the grass about three inches long in the fall to leave for a winter cover.

If you sprinkle your lawn, be sure to soak it thoroughly in the evening. Just wetting the soil is sure to cause injury to the lawn.
